Information Technology Support Specialist

Associate Degree Program

Academic High Honors

SKILLS

- Detail-oriented
- Honest and hardworking
- Quick learner
- Strong organizational skills
- Team collaboration and task ownership
- Experienced in: C++, Java, Python

WORK EXPERIENCE

IT Intern

FyterTech Nonwovens, July - December 2024

I was responsible for filming and editing training videos, ensuring they were clear and informative. I also updated the IT inventory to keep records accurate and up to date. Part of my duties included checking the filters in the Intermediate Distribution Frames (IDFs) to make sure they were clean and free of excessive dust. In addition to these tasks, I assisted with various other IT responsibilities as assigned.

Packer

ADRC Meals on Wheels, June - August 2023

I helped package approximately 500 meals per day, maintaining a consistent and efficient workflow to ensure all meals were prepared on time. I also coordinated meal deliveries, verifying that each bag contained the correct number of meals to meet distribution requirements. Throughout the process, I focused on sustaining a steady pace and attention to detail to support the overall success of the meal packaging operation.

Stocker

St Vincent De Paul June - August 2022

I stocked shelves in the main store, ensuring products were neatly arranged and accessible to customers. Additionally, I reorganized items throughout the store, returning misplaced products to their proper locations to maintain a clean and orderly shopping environment.
